

2016 data	Volume sold	MID levy	
		Rs / L	Rs (000)
Gasolene	224,000	0.30	67,200
Gas Oil	257,600	0.30	77,280
Total			144,480

The JTC recommend the equal sharing based on sugar produced of the overall MID petroleum levy contribution amongst planters.

- (ii) A minimal contribution of Rs 0.10/kwh on fossil fuel energy invoiced by CEB to consumers.

According to Statistics Mauritius, from the Energy and Water Statistics 2016 published in June 2017, a total of 2,558GWh has been invoiced by CEB to consumers and by extrapolation, when extracting renewable energy produced, a balance of 1,894GWh has been invoiced produced from fossil fuel.

	Yr 2016
Total energy invoiced	2,558GWh
Renewable Energy produced *	664GWh
Fossil energy	1,894GWh
* Including own consumption	

The JTC recommends a minimal contribution of 10cts/kwh on fossil energy invoiced to generate an additional income of Rs200M to be directed towards bagasse remuneration. The JTC recommends a positive sharing differential to small planters representing 16% of the share of sugar produced:

- Small : 16% increase on equal divide of sum for planters
- Others planters: balance left over equally shared

2.1.5 The Table below summarises the general bagasse funding proposal of the JTC:

General bagasse funding for 2018

Description	Rs (M) in 2018
1. RNC recommendation ¹	323
2. MID on Petroleum	145
3. CEB contribution	200
Total	668
Average bagasse remuneration	Rs 2,447 / t sugar

Note 1: RNC recommendations: BTPF Rs64M + Coal Levy Rs259 M = Rs323M.
